Don't, you'll regret it.. nice short game makes us realize the sad thruth, but i still love AI. 3 different routes . u can finish all in half n hour. Simple kinetic novel, you can go through all the routes fairly quickly. Nice surprise in the game and some top-notch character interaction! It really felt like they were good friends!

I mean, it's free and quick. Go for it!. 8V10

PRO: Has a really good plot that will keep you on the edge of your seat with one of the most shocking endings i've ever seen in my live. It's worth penny and you will not regret getting in.

CON: There's not much wrong with this game if you ask me, but one thing that is bad about it is how short it is. I was getting really into it, the story had me hooked till the very end and all i could ask for is a sequel.

. Well that was cute.. Very short freeware visual novel, with a single achievement attached. That achievement is quite fun, by the way. Just like the novel. I liked the amount of different languages I can read through...

Generally, I suggest this Carpe Diem piece to all people who don't mind reading some short novels about social relations... And to all achievement hunters, for a quite easy complete game.

And I suggest Carpe Diem as a motto to all people who are spending time like me now. Seriously. What am I doing with my life?! Oh, gosh, that's too pathetic.

Mark 9V10.. As a free game, I found this to be well crafted and a fun time overall. I was so dumb and such an idiot that I didn't realize the female's name, AI, was actually A.I. as in Artificial Intelligence. Until it was explained to me by a friend. Although this game has no different endings it definitely had a twist I wasn't expecting. Which I would've if I just put two and two together. In the end, it's definitely worth a try considering it's a free visual novel.

This 7-minute long VN is not worth your time. Nothing really interesting and you can already guess the ending right from the character's name!. 11 minutes. Bye.. nice game <3. I was in debt I was paying a credit card off with another, i had bone cancer my car was running bad my wife and kids left me, my left knee was bad. Intill i plyed this awesome visual novel this solved everything its thrilling yet entertaining and engaging love the work from the creators and its free would recomend 11V10. \ud83d\udef2. I mean.. it's not bad at all for someone's first attempt at creating a visual novel, but it could have been better executed. There's hardly any plot, the twist is not worth it and there is no build-up to it because of how short everything is. The characters are uninteresting - well, I mean, how much development can a character with the short life of five minutes even get - and things that could have been visually conveyed through simple drawings were not, so laziness was a thing at work here as well. How can you be lazy with a game that takes ten minutes to complete? If I made a game that was ten minutes long, I'd want to make it the fullest game I can. This is mostly the reason why I put 'do not recommend'. This is just hardly an experience at all. As I said, dear developer, you can do great things but you just didn't this time.. Dammit man, the ending really makes me feel really deep. This game is really good for a small size VN and the storyline is very simple.

10V10 Gonna search for "Carpe Diem: Reboot". There's not enough here to make it worth the time it takes to "play". A few pictures and a bunch of text, really. The girl is your stereotypical anime female (bad cook, loves cute things) which might be nice if you like that kind of thing. There is a meta-twist at the end which is kind of neat, but getting there is tedious.
